MACARTHUR FOUNDATION

The John D. and Catherine T. MacArthur Foundation supports creative people and effective institutions committed to building a more just, verdant, and peaceful world. In addition to selecting the MacArthur Fellows, the Foundation works to defend human rights, advance global conservation and security, make cities better places, and understand how technology is affecting children and society.

MacArthur is one of the nation’s largest independent foundations. Through the support it provides, the Foundation fosters the development of knowledge, nurtures individual creativity, strengthens institutions, helps improve public policy, and provides information to the public, primarily through support for public interest media. As part of the Alternatives platform, the business has the ability to generate viable financial returns and real social and environmental outcomes of its investments and is organized around three components: financial inclusion/microfinance; social enterprise financing (agriculture, health, and energy); and energy efficiency/renewable energy investing. The team’s capabilities are focused on creating investable products for institutional investors, development banks, governments, and private investors who share common investment objectives around specific themes.

Treehouse Investments, LLC, is a privately owned firm targeting investments that address global warming and support the development of the globalizing middle class.
